■ MODELS	
T430	Simplex printing only
T430d	Duplex built-in model
T430dn	Network & duplex built-in model

Lexmark's T430 mono laser is the ideal solution for small workgroups demanding professional quality output for their general office printing needs. It's inexpensive to own, easy to use and perfect for space-sensitive areas too!

Hard at work for you

The T430 delivers outstanding quality and performance. You can enhance your documents with crisp 2400 Image Quality printing, and boost productivity with up to 30ppm print speeds and a time-to-first-page of 8 seconds. You'll also benefit from a robust monthly duty cycle of up to 65,000 pages. The right amount of might for your busy office!

Just the way you want it

Want to cut back on paper waste? You can opt for the T430d model, which comes standard with automatic duplex printing. Want to spread the advantages across your network? The T430dn model includes a built-in network adapter, as well. You can add additional input trays to run various media, or to boost input capacity. And if you have specialised printing needs - such as bar codes, IPDS, encrypted data and foreign language fonts - all the T430 models support this with optional modules.

Innovation made easy!

For starters, configuration is quick and simple: via a user-friendly LCD control panel, any user can set it up without even needing a PC. And operating it is a breeze! You'll also save time and money thanks to easy-to-replace toner cartridges that reach up to 12,000 pages. And with the network model, you'll benefit from MarkVision Professional software, which practically manages your entire network fleet for you—including automated email alerts for low toner and paper. So you can concentrate more on your business, and leave the printing to Lexmark!

PRINT-MOVE-MANAGE services

Supported by Lexmark award winning technology, innovative business applications and strong strategic service offerings, Lexmark's highly skilled, specialised account team can assist your organisation to print smarter, move critical information faster and manage your output related costs more efficiently. This value proposition, Print-Move-Manage, translates into a set of industry-specific solutions and expertise allowing you to improve, maintain and manage your document and printing infrastructure.

PRINT: A full range of advanced printing solutions based on industry leading technology and associated product services that provide leading edge functions at a very competitive cost. These include printers, multifunction devices as well as network and application-specific hardware and software solutions

MOVE: Consulting and implementation services designed to increase productivity while reducing the costs related to your paper-intensive processes through device consolidation, distributed document capture, distributed printing, electronic form integration and paper document workflow automation

MANAGE: A range of services offerings designed for today's business. Starting from the traditional leasing of equipment through per page based billing up to full contract management and outsourcing of your output device fleets. These offers are designed to deliver you the most cost effective solution for output and document management.
