High Power Ceiling Wireless AP

11ac 1300Mbps Wave2 Ceiling Wireless AP

Model: XD5200

Description:

XD5200 is an MU-MIMO 11ac Wi-Fi standard Qualcomm Chipset high power industrial Ceiling Wireless Access Point support Wave2.0.

Combined 1300Mbps Wi-Fi speed over 2 radios: 2.4GHz(400Mbps)+5GHz(900Mbps)), equipped Gigabit WAN & LAN port, fast Ethernet data rate make more than 100 end users can access into XD5200 with Gigabit Ethernet, make them to enjoy HD movies, streaming, online gaming, wireless security and other bandwidth-intensive tasks, widely be used in school, hospital, hotel, office, shipping mall...

High Power for more range and stable signal

High Power Ceiling Wireless AP

Designed in Power Amplifier on PCB board, the power can be 300mW high power, 3dBi MIMO high gain antenna, together with Ceiling mount, greatly increase the wireless range and supply the stable Wi-Fi signal for users.

Metal Case, perfect heat dissipation to extend the working life

The bottom shell with metal shell, improved the heat dissipation function, make it work as normal in -30 $^{\circ}$ C to 70 $^{\circ}$ C, extend the device working life.

MU-MIMO, Wave 2.0 Technology

Comply with Wave2.0 Technology, it adopt 256QAM modulation, support MU-MIMO (Multi-User Multiple-Input Multiple-Output), 8 Spatial Steams, greatly to improved the communication efficiency.

Beamfrorming, DFS, Airtime Fairness, Band Steering, OFDM support

XD5200 support many functions like Beamfrorming, DFS(Dynamic Frequency Selection), Airtime Fairness, Band Steering (5G Prior), OFDM(Orthogonal Frequency Division Multiplexing), RF Power adjustable to improve the performance and Wi-Fi stability.

Power over Ethernet and DC Power available

XD5200 has integrated IEEE802.3at Power over Ethernet (PoE), for easy installation and lower cost. What's more, it support DC input if need, So it can be installed in areas where power outlets are not readily available, eliminating the mess of altering existing network infrastructure.

Access Controller System & Cloud Management System

With Access Control System, plug and play, zero configure the AP's IP address, ESSID, Channel, Password, upgrade firmware, backup and restore....

What's more, the AC controller with local authentication function, easy to do advertisement and captive portal authentication like Member/WeChat/SMS login.

Besides that, administrator can remote manage through AC controller or cloud server at any place/time, simple and cost save in maintenance.

Main Features:

- Comply with IEEE 802.11ac/b/g/n, dual band, 1300Mbps Data Rate
- 1*10/100/1000Mbps WAN Port, 1*10/100/1000Mbps LAN Port, faster Ethernet.
- 300mW high power, build in 3dBi MIMO antenna, stronger signal strength, more wireless coverage,
 32M Flash, 512M DDR3 RAM, more user, more stable
- Support active IEEE 802.3at 48V PoE standard
- Support SSID broadcasting, Multi SSID up to 12 (4 SSID in 2.4GHz, 8 SSID in 5GHz)
- Support Gateway (PPPOE, static IP, dynamic IP) , Wireless AP, Repeater, WISP operation mode
- With function of build in firewall, IP filter, URL filter and MAC filter
- Comply with IEEE 802.3az standard, RF power adjustment and frequency analyzer for better application in different environment
- Support DDNS, VPN pass through, Port forwarding and DMZ host ,support WMM.

High Power Ceiling Wireless AP

- Comply with ISO9001
- En/IEC 60950 ,EN300328-2 ,CE and FCC ,WI-FI Alliance.
- Support 64/128-bit WEP security, EAP, 128bit WPA (TKIP/AES) security

Product Spec.:

Hardware:								
Chipset	Qualcomm IPQ4019+QCA8075							
Standard	802.11ac/b/g/n, MIMO technology							
Memory	512MB DDR3 RAM							
Flash	32MB							
Interface	1 * 10/100 /1000Mbps RJ45 WAN Port							
	1 * 10/100 / 1000Mbps RJ45 LAN Port							
	1 * Reset button, press 10 seconds to revert to default setting							
Antenna	Build in 3dBi MIMO 2.4G Antenna , 5DBI MIMO 5.8G Antenna							
Power consumption	48V PoE<30W							
Size	198mm X 32mm							
RF Data								
Frequency	2.4G:802.11b/g/n: 2.4GHz - 2.484GHz							
	5GHz:802.11a/n/ac MIMO: 5.150GHz~5.850GHz							
Country code	FCC、IC、ETSI、MKK、MKK1、MKK2、MKK3、NCC、RUSSIAN、CN							
Modulation	OFDM = BPSK,QPSK, 16-QAM, 64-QAM, 128-QAM, 256-QAM							
	DSSS = DBPSK, DQPSK, CCK							
Throughput	1300Mbps
